Ex-Pfizer VP: COVID vax push a ‘supranational operation’ intended to ‘maim and kill deliberately’

‘Multiple obvious toxicities were deliberately built into [the alleged vaccines] designs, with the result that there would be high expectations of blood clots, autoimmune attacks and cytokine storms all over the body, depending on where it went in a given individual,’ Dr. Michael Yeadon told LifeSiteNews.

([LifeSiteNews](#)) — Dr. Michael Yeadon, who formerly served as Pfizer’s vice president and chief scientist for allergy and respiratory, explained how he knew the COVID virus, with its subsequent “[vaccine](#)” campaign, was a “supranational operation” designed “to injure people, to maim and kill deliberately.”

Yeadon, who spent 32 years working mostly for large pharmaceutical companies, spoke to a reporter from Children’s Health Defense in March while attending a [Truth be Told Rally](#) in London.

Reviewing how he came to understand the COVID “pandemic” was something other than what it appeared to be, the pharmacology expert recalled that “when I started noticing former colleagues of mine, including Patrick Vallance, saying things on the television I knew weren’t true — and I knew he knew weren’t true — that’s when the penny dropped for me, probably [in] February 2020.”

Patrick Vallance was the United Kingdom’s chief scientific adviser to the government from 2018 to 2023.

“I remember saying to my wife, ‘this is not what they’re saying it is. Something’s going on,’” Yeadon explained.

“And when I saw not only my country locking down, but dozens of countries locking down at the same time ... that was proof, and is still proof, of a supranational operation,” he said.

“There’s no way that could have happened at the local level, at the country level. Therefore, it must have occurred at a level above. Whether it was the WHO or the World Economic Forum, or other, I don’t know,” but the orchestrated response demonstrates a planned event as opposed to one determined by the chance of the virus developing, Yeadon said.

These governments “all did the same stupid, ineffective, known-not-to-work things at the same time, none of which were in their countries’ pandemic preparedness plans, because I’ve read them all,” the toxicology expert assured.
