As the [World Health Organization pandemic treaties](#) bear fruit, the mark of the beast has arrived in Europe. Everything the Public Health™ experts have done since the start of the COVID-19 pandemic has led to this moment of triumph for the global technocracy.

“WHO & EU_Commission launch landmark digital health initiative to help protect people across the world from on-going & future health threats,” WHO tweeted out on June 5. “This is the first building block of the WHO Global Digital Health Certification Network that will develop a wide range of digital products to deliver better #HealthForAll.”

Orwellian digital social control grids are loving, and liberal. #HealthForAll.

Via [World Health Organization](#) (emphasis added):

*In June 2023, **WHO will** take up the European Union (EU) system of digital COVID-19 certification to **establish a global system that will help facilitate global***

mobility and protect citizens across the world from on-going and future health threats, including pandemics. This is the first building block of the WHO Global Digital Health Certification Network (GDHCN) that will develop a wide range of digital products to deliver better health for all.

By “facilitate global mobility,” they mean immobilizing “anti-vaxxers” or, in fact, any enemy of the state by denying them entry to countries that have handed their border control over to the WHO.

Continuing:

*Building on the EU’s highly successful digital certification network, WHO aims to offer all WHO Member States access to an open-source digital health tool, which is **based on the principles of equity, innovation, transparency and data protection and privacy**,” said Dr Tedros Adhanom Ghebreyesus, WHO Director-General. “New digital health products in development aim to help people everywhere receive quality health services quickly and more effectively”.*

By definition, an international, unelected regime with access to individuals’ most private medical data is incompatible with “data protection and privacy.”

Continuing:

*One of the key elements in the European Union’s work against the COVID-19 pandemic has been digital COVID-19 certificates. **To facilitate free movement within its borders**, the EU swiftly established interoperable COVID-19 certificates (entitled ‘EU Digital COVID-19 Certificate’ or ‘EU DCC’). Based on open-source technologies and standards it allowed also for the connection of non-EU countries that issue certificates according to EU DCC specifications, becoming the most widely used solution around the world.*

Note, again, the rhetorical sleight of hand. The government first restricts movement in Europe based on debunked pseudoscience, then offers as the solution vaccination

certificates that “facilitate free movement.” The government invents a problem, grants itself authority over solving said problem, and then frames itself as the savior.
